Version 1.0 · Internal use

Up and running in 10 minutes 

> Before you start

The essentials to run the system day to day.

This is the system we use to manage **pickups, deliveries, storage and billing**. The key things:

- **Everything is live:** if a teammate adds or changes something, you see it instantly — no need to reload the page.
- **It runs in the browser** (computer or phone). Nothing to install.
- **Your work screen is Dispatching.** That's where you'll spend 80% of your time.

Note: a few buttons and labels in the app are still in Spanish — this guide shows them exactly as they appear on screen, with the English meaning in parentheses.

Contents

1 • Access	How to sign in
2 • The menu	The sidebar sections
3 • Dispatching	The daily board (the most important part)
4 • Create a job	Job types and data entry
5 • Storage	Rented units and warehouses
6 • Brokers & Drivers	Companies and drivers
7 • Billing	Monthly storage billing to the client
8 • Tips + Glossary	Golden rules and key terms

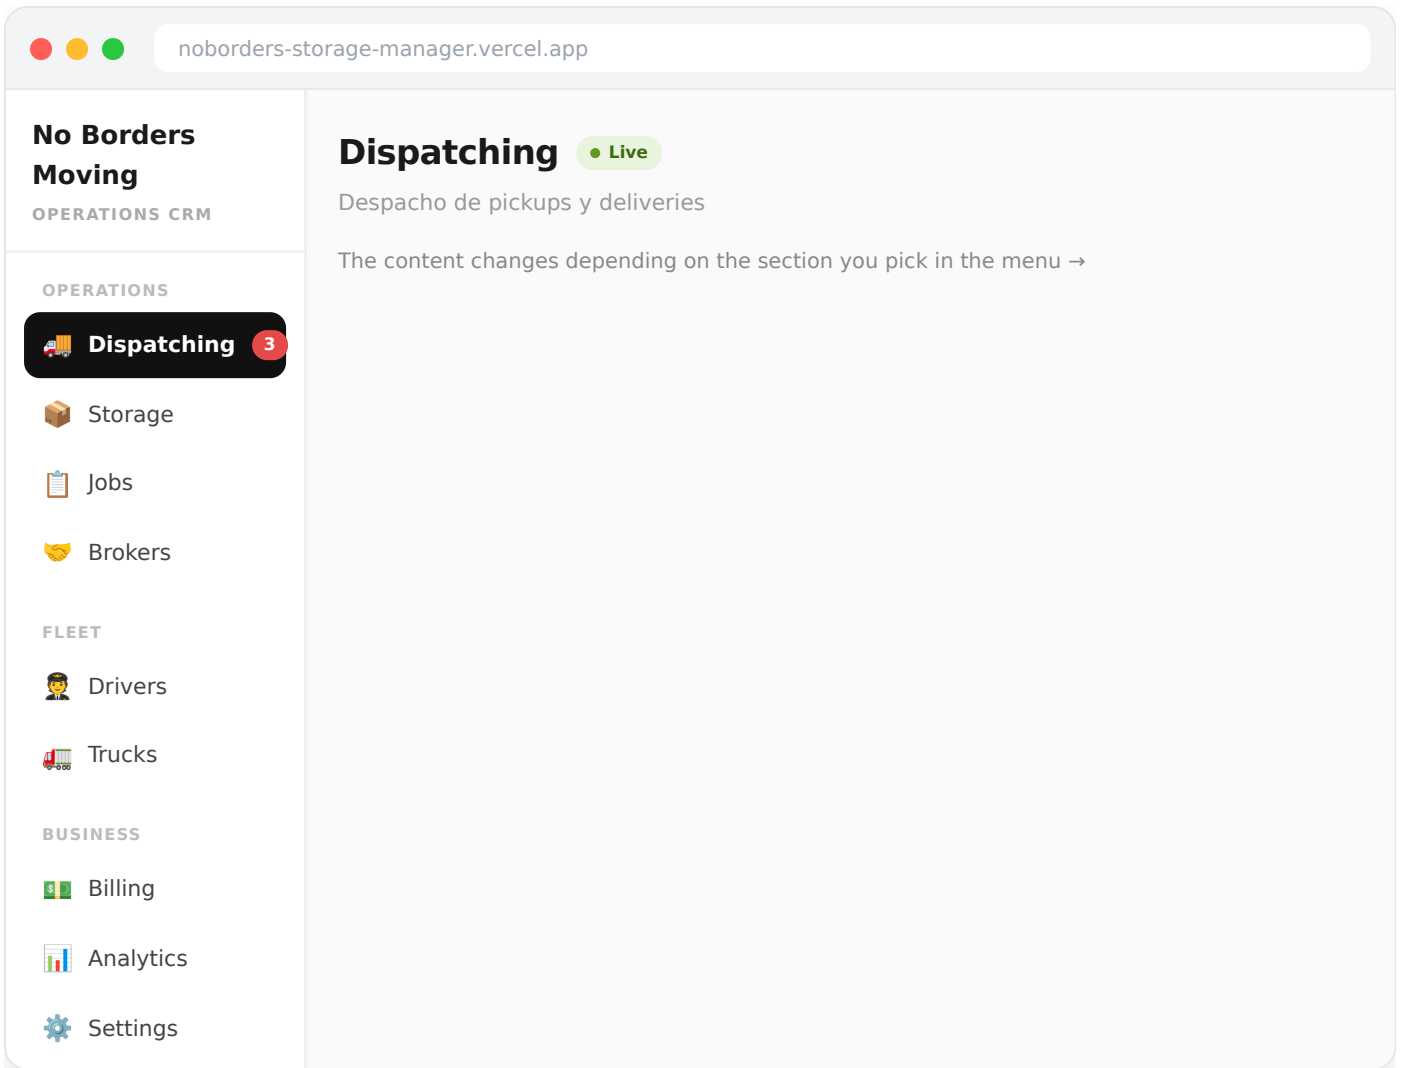

1 Access

Signing in.

- Open the **system link** in your browser.
- Sign in with your **email and password** (no account yet? ask your manager).
- You land directly on **Dispatching**.

2 The left-hand menu

Everything is navigated from the sidebar, split into three blocks.

The sidebar. The red number on Dispatching = jobs that need attention today.

SECTION	WHAT IT'S FOR
 Dispatching	The daily board: pickups, deliveries and the status of every job. Your main screen.
 Storage	Rented units and owned warehouses (Indiana / New Jersey) with occupancy.
 Jobs	All jobs with full detail (active and delivered).
 Brokers	Brokers (Allied, Atlas, Mayflower...) and each one's pending balance.
 Drivers	Drivers and how many jobs each one has (they populate automatically).
 Billing	Monthly storage billing to clients.
 Analytics	Operation charts + AI recommendations.

3 Dispatching — the daily board

The most important screen. Top to bottom: metrics → alerts → tabs → table.

ESTADO	JOB #	TIPO	BROKER	CLIENTE	FADD	PICKUP	D
Picked up	A1826927	Full	Allied	Monique F Hall	Overdue	06-24 · Kansas City, MO	0 N N
Scheduled	FV8132056	Broker	Mayflower	Imad Majeed	6 días	06-26 · Louisville, KY	0 C O
In storage	H2474156	Direct	—	Dustin Newman	14 días	06-18 · Sewickley, PA	0 A

3 jobs · (the real table also has CF, Sticker/Lot and the balances → scroll right)

The Dispatching screen: metrics on top, alert banner, sub-tabs, and the jobs table with its actions. (“Pickups hoy” = Pickups today · “Sin FADD” = No FADD · “+ Nuevo job” = New job · “requieren atención” = need attention.)

The columns, one by one

COLUMN	WHAT IT SHOWS
Estado (Status)	Job stage (Scheduled → Picked up → In storage → Out for delivery → Delivered).
Job #	The job number. Tap it to open the full detail.
Tipo (Type)	Full / Direct / Broker (see section 4).
Broker · Cliente (Customer)	The company the job is for, and the customer's name.
FADD	Earliest possible delivery date, color-coded by urgency.

Pickup • Delivery	Date + city of where it's picked up and where it's delivered.
CF • Sticker • Lot	Volume (cubic feet), sticker color and lot number.
Driver	Assigned driver.
Bal. pickup / delivery	Money to collect at each stage.

FADD colors

FADD = **First Available Delivery Date** (the earliest date it can be delivered). It drives priority.

- **Overdue** Already past due — top priority.
- **3 days** Due within 3 days.
- **7 days** Due within 7 days.
- **14 days** 8 days or more — relax.
- No FADD** Date not set yet.

✂ **The 3 action buttons**

-  **Ruta** Opens Google Maps with the storage → customer route. *(Ruta = Route)*
-  **WhatsApp** Opens WhatsApp with the message **already filled in** for the driver.
-  **Advance** Moves the job to the next stage. The button tells you which.

The status flow

Each time you tap **Advance**, the job moves to the next stage:

Important: **Direct** and **Broker** jobs do NOT go through *In storage* (they go Picked up → Out for delivery). When you mark it **Delivered**, the job leaves the active lists automatically.

4 Create and edit a job

Tap “+ **Nuevo job**” (= New job), top right in Dispatching or Jobs.

Full

Pickup → **storage** → delivery. It's stored in between.

Direct

Pickup → delivery. Straight through, no storage.

Broker delivery

Delivery only: the goods are already here, you just deliver them.

What you fill in

- **Where it's stored** — tick one or more units and/or warehouses (a job can occupy several places).
- **Job data** — Job #, Customer, Type, Status, Broker, Driver, FADD, Volume (CF), Lot #, Sticker color.
- **Pickup** and **Delivery** — date, address, city, state, zip and the **balance to collect** at each stage.
- **Storage billing** — whether the client is charged monthly for storage (see section 7).

Edit later: tap the **Job #** to open the detail and **click almost any field to change it on the spot** (FADD, customer, driver, addresses, balances...). There's also an **Editor** (Edit) button for the full form.

5 Storage — units and warehouses

The Storage section has one tab per place: **Storage Units**, 🇺🇸 **Indiana** and 🇺🇸 **New Jersey**.

noborders-storage-manager.vercel.app — Storage · New Jersey

Storage Units 🇺🇸 Indiana 🇺🇸 New Jersey

 **New Jersey**

Warehouse propio · 3 job(s) activo(s)

78% ocupado

7,800 usado · 2,200 libre · 10,000 CF total

+ Job a este warehouse

Editar capacidad

JOB #	CLIENTE	LOT #	STICKER	VOLUMEN	DRIVER	FADD	ESTADO
FV8127071	Robert Hillman	PV0701	● Blue	800 CF	Carlos Chacon	● 2 días	● In storage
A1824731	Anita M. Aloï	487611	● Green	1,051 CF	Lorenzo A.	● 11 días	● In storage

Each warehouse shows its occupancy (green <70%, amber 70-90%, red >90%) and the table of jobs inside it. (“Warehouse propio” = Own warehouse · “% ocupado” = % occupied · “usado/libre” = used/free · “+ Job a este warehouse” = Add job here · “Editar capacidad” = Edit capacity.)

Storage Units

Inside there are two sub-tabs:

- **Unidades** (Units) — the physical lockers with their **occupancy** bar. If it's empty, tap **“Set capacity”**.
- **Jobs en unidades** (Jobs by unit) — what's stored in each locker (one row per unit).

Add / import

“+ Unidad” (+ Unit) for a new unit. You can also **Import from WhatsApp** by pasting the message or uploading the chat .zip. The **gate code** copies with one click.

6 Brokers & Drivers

👤 Brokers

List of brokers with contact, phone and email. For each one you see **how many jobs** they have and the **pending balance**. You can **add, edit or delete**. When creating a job, pick the broker from the dropdown.

👤 Drivers

List of drivers. They populate **automatically** as you assign them in jobs. You see how many **active** and **delivered** jobs each one has.

7 Billing — charging storage to the client

Some clients pay a monthly fee to store their goods (negotiated case by case). The system handles it automatically.

noborders-storage-manager.vercel.app — Billing

Billing

Cobro de storage a clientes

Total pendiente

\$2,450

Overdue

2 · \$600

Vence esta semana

3 · \$900

Cobrado este mes

\$1,800

Todos

Pendientes

Overdue

Pagados

ESTADO	CLIENTE	JOB #	STORAGE	DÍAS	PERÍODO	MONTO	ACTIONS
Overdue	Robert Hillman	FV8127071	Warehouse NJ	62 días	05-01 → 05-31	\$300	Marcar pagado
Pending	Mary C Holby	A1826407	Ez Storage	21 días	06-10 → 07-10	\$150	Marcar pagado
Paid	Nola Doak	HV4613605	In Better Hands	40 días	05-15 → 06-14	\$200	Paid 06-12

The Billing page: the system auto-generates each 30-day cycle's charge and flips past-due items to Overdue. ("Total pendiente" = Total pending · "Vence esta semana" = Due this week · "Cobrado este mes" = Collected this month · "Marcar pagado" = Mark as paid · "Días/Período/Monto" = Days/Period/Amount.)

Turn it on in the job

In the form, **Storage billing** section: tick **"Charge the client"**, enter the **monthly rate**, choose whether the **1st month is free**, and review the **start date** (auto-calculated, but editable).

Collect & remind

Mark as paid records the date. **Reminder** opens WhatsApp with a message ready to send to the client. Past-due items flip to **Overdue** automatically.

8 Golden rules & glossary

🎯 The 4 rules of the day

1. Check **Dispatching** and tackle the **red/orange FADD first**.

2. Make sure **no pickup/delivery for today is left without a driver**.

3. Always notify the driver with the job's **WhatsApp** button (it already includes all the data).

4. **Advance the status** as soon as each stage happens, so the board reflects reality.

Quick glossary

TERM	WHAT IT MEANS
FADD	First Available Delivery Date — the earliest date the job can be delivered.
CF	Cubic Feet — volume in cubic feet.
Lot #	Lot number from the sticker on the goods.
Sticker	Color / label that identifies the load.

Full / Direct / Broker	Job types: with storage / straight through / delivery only.
Broker	The company the job is for (Allied, Atlas...).
Balance	Money to collect (at pickup or at delivery).
Billing	Monthly fee charged to the client for storing their goods.
Gate code	Code to get into the storage unit.
