> Before you start

Read this page first — it explains how the guide and the system work.

- **Everything is live:** when a teammate changes something you see it instantly, no reload needed.
- **It runs in the browser** (computer or phone). Nothing to install.
- **What you see depends on your permissions** — missing sections in your menu means no access (ask an admin).
- The images in this guide are **faithful recreations of the real screens** so you know exactly what to look for.
- A few labels in the app appear in Spanish even in English mode (e.g.  **Ruta**). The guide shows them **exactly as they appear on screen**, with the meaning in (*italics*).
- Steps are numbered **1, 2, 3...** — buttons you tap look like this:  .

Contents

1 · Sign in & the menu	Getting around
2 · Dispatching	Reading the daily board
3 · Creating a job	The "+ New job" form, field by field
4 · The job detail	Editing, timeline, marking delivered
5 · Calendars	Pickup calendar + scheduling deliveries
6 · Storage	Units, warehouses, WhatsApp import
7 · Storage Billing	Monthly charges to clients
8 · Brokers	Managing broker companies
9 · Settlements	Closing sheets & BOL collections
10 · Extras & Commissions	Adding extras, commission rules
11 · Trips / Live Load	Creating trips, drops, splits, AI, handoffs
12 · Payments	Recording payments, deposits, bank accounts
13 · Drivers & Trucks	The fleet
14 · BOL & Documents	Generating and signing Bills of Lading
15 · Claims & Incidents	Reporting and resolving problems
16 · Chats	Team messaging
17 · Clients · Analytics · Suggestions	Customers, dashboards, ideas
18 · Users & Settings	Inviting users, permissions, language
19 · Golden rules + Glossary	The daily routine and key terms

1 Sign in & the menu

Where everything lives.

HOW TO · Sign in

- 1 Open the **system link** in your browser.
- 2 Enter your **email and password**. Accounts are created by invitation — if you don't have one, ask an admin (section 18).
- 3 You land on **Dispatching**. To leave, use [Sign out](#) at the bottom of the sidebar.

STATUS	JOB #	TYPE	BROKER	CLIENT	FADD	PICKUP	DELIVERY	DRIVER	TRIP	AC
● Picked up	⚠ A1826927 Not collected	Full	Allied	Monique F Hall	● Overdue	06-24 · Kansas City, MO	06-30 · Newark, NJ	Andres M.	TRIP-004	📄 💬 🗑
● Scheduled	FV8132056 Extras	Broker	Mayflower	Imad Majeed	+ FADD	06-26 · Louisville, KY	07-02 · Columbus, OH	—	Unassigned	📄 💬 🗑

The board. Note the tags under the Job # and the dashed "+ FADD" button when the date is missing.

🍷 FADD colors (First Available Delivery Date)

- Overdue Past due — top priority.
- 3 days Due within 3 days.
- 7 days Due within 7 days.
- 14 days 8+ days — relax.
- No FADD Missing — tap + FADD to set it.

🔖 Tags next to the Job

- ⚠ — sticker not assigned yet.
- Collection pending BOL not collected (broker delivery).
- Extras the job has extras loaded.
- Outstanding money still to collect.
- Not collected delivered but NOT fully paid. Chase it!

HOW TO · Move a job to its next stage

- 1 Find the job's row (use the search box or the sub-tabs).
- 2 In **Actions**, tap the advance button — it always names the next stage, e.g. → In storage.
- 3 The status flow is: **Scheduled** → **Picked up** → **In storage** → **Out for delivery** → **Delivered**. Only **Full** jobs pass

through *In storage*; Direct and Broker jobs skip it. Marking **Delivered** removes the job from the active lists.

Other row actions:  **Ruta** (*Route*) opens Google Maps storage → customer ·  **WhatsApp** opens WhatsApp with the full job info pre-written (or the trip manifest if it rides on a trip) ·  **Delete** deletes the job (section 19 warning applies).

3 Creating a job

The form adapts to the job type. Below: the modal as you'll see it, then every field explained.

HOW TO · Create a new job

- 1 Tap **+ New job** (top right in Dispatching, Jobs or the calendars).
- 2 Fill **Basic info**: **Job #** (required — if it already exists you'll see a ⚠ duplicate warning), **Job type** (Full / Direct / Broker), **Broker**, **Client** (required) + **Client phone** / **Client email**, **Rep**, **Status**, **Calendar status (color)** and tick one or more **Drivers**.
- 3 Fill the **Pick up** block (Full/Direct): date **from/to** (a range is allowed), address, city, state, zip. Full jobs also have **Extra stops**.
- 4 Fill the **Delivery** block: **FADD** (required!), delivery date, address, city, state, zip.
- 5 Fill **Load / Carga: Volumen (CF) — estimado broker** (*broker's estimated volume*), **Real CF (medido al cargar)** (*real measured CF — leave empty to use the estimate*), **Sticker color**, **Lot number**, notes.
- 6 **Pads**: received from broker / returned — "missing" is computed automatically.
- 7 Fill **Financiero** (*Financials*): **Estimate**, **Deposit**, **Pickup balance**, **Delivery balance**, **Precio/CF**, **Fuel surcharge %**. Broker deliveries instead show: **BOL balance to collect from client**, **Carrier rate/CF**, auto **Carrier total**, **Closing sheet** link, **BOL collected**. Optional: tick "👉 **El broker se queda con un % del balance**" (*broker keeps a % of the balance*) and set the %.
- 8 Open **Storage (opcional)** and tick where it's stored: a 🏠 **warehouse** (Indiana / New Jersey) and/or one or more **rented units**; set **Date in**.
- 9 (Full jobs) Open **Client storage billing** and tick "**Bill this client for storage (every 30 days)**" if they pay monthly — see section 7.
- 10 Tap **Save job**. Done — the job appears on Dispatching instantly for everyone.

WhatsApp

→ In storage

Mark all delivered

Close

The job detail. The footer holds the big actions; the body is organized in sections.

HOW TO · Edit a job field on the spot

- 1 Open the job (tap its **Job #** anywhere).
- 2 In **Job data**, click the **value** you want to change (FADD, client, addresses, balances, sticker, Real CF...). It turns into an input.
- 3 Type the new value and press **Enter** (dates save when you pick them). For the full form use the **Edit** button.

HOW TO · Log an event in the job's timeline

- 1 In the job detail, scroll to **Timeline** and tap **+ Add evento** (add event).
- 2 Set the **Date** and pick the **Event type**: *Picked up · Loaded to truck · Dropped at storage · Loaded from storage to truck · Delivered · On hold · Attempted delivery — not home · Redispatched · Driver handoff · Other*.
- 3 Optionally pick the **Storage / warehouse** and **Trip #** it relates to, add **Notes**, and tap **Save event**.
- 4 Trip actions (drops, deliveries) appear in the timeline **automatically** with an "auto" tag — you only log what the system can't see.

Where it's stored: the last section shows each storage location of the job with its gate code (one-tap copy), **Split** (divide between two trucks) and **Mark delivered** per portion.

5 Calendars — pickups & scheduling deliveries

Two calendars in the menu: **Pickup Calendar** and **Delivery Calendar**. Same controls, different purpose.

The Delivery Calendar with the "Entregas por agendar" (deliveries to schedule) panel on top.

HOW TO · Schedule a delivery

- 1 Open **Delivery Calendar**. The **Entregas por agendar** panel lists every job that's ready but has no delivery date; jobs with **FADD ≤ 7 days** are flagged in red.
- 2 On the job's row, pick the **date** and tap **Agendar** (schedule). The job lands on the calendar.

HOW TO · Put a job on a specific day

- 1 Click a **day header** (it shows a "+") → choose **Create new job on this day** or **Add an existing job to this day**.
- 2 For an existing job: search by job # / client / driver — only jobs **without** a pickup (or delivery) date are listed — then tap **Add**.
- 3 Toggle **Week** / **Month** and navigate with **Today** . Event colors follow the legend: **Active** · **On hold/Redispatch** · **Cancelled** · **Long haul** · **Delivered**.

6 Storage — units & warehouses

Tabs: **Storage Units** (rented lockers) · 🏠 **Indiana** · 🏠 **New Jersey** (own warehouses). Top buttons:

Importar WhatsApp · **+ Unit** · **+ Job a unidad** (add job to a unit).

HOW TO · Add a rented storage unit

- 1 Tap **+ Unit**. Fill: **Company** (pick or type — CubeSmart...), **Status** (state, e.g. TN), **Zip**, **Address**, **Unit #** (duplicates are flagged ⚠️), **Tamaño** (size, e.g. 10x10), **Gate Code**, **Lock/Combo**, **Driver que abre la unit** (driver who opens it), **Email / Account # / Phone**, **Monthly cost**, card, **Open date**, **Payment due date**.
- 2 Tap **Save**. In the list, set the CF **capacity** with **Set capacity** so the occupancy bar works.
- 3 The **gate code copies with one click** from the table. **Renew — add 30 days** (in the unit detail) extends the payment due date.

HOW TO · Import units from WhatsApp

- 1 Tap **Importar WhatsApp**. Choose **Pegar texto** (paste text) or **Subir ZIP del chat** (upload the exported chat .zip).
- 2 Paste the group messages (or drop the .zip), tap **Previsualizar** (preview) — the system detects "{driver} · {company} · Unit {unit}" entries.
- 3 Untick any you don't want and tap **Importar (n)**.

Operations CRM — Storage · New Jersey

Storage Units 🏠 Indiana 🏠 New Jersey

🏠 **New Jersey**

Own warehouse · 3 job(s) activo(s)

78% occupied

7,800 used · 2,200 free · 10,000 CF total

+ Job a este warehouse **Edit capacidad**

JOB #	CLIENT	LOT #	STICKER	VOLUMEN	DRIVER	FADD	STATUS
FV8127071	Robert Hillman	PV0701	● Blue	800 CF	Carlos Chacon	● 2 days	● In storage
A1824731	Anita M. Aloï	487611	● Green	1,051 CF	Lorenzo A.	● 11 days	● In storage

A warehouse tab: occupancy bar (green <70%, amber 70-90%, red >90%) + the jobs inside. Jobs that are Out for delivery are hidden automatically.

7 Storage Billing — monthly charges to clients

For clients who pay a monthly fee to keep their goods stored. The system generates each 30-day charge by itself.

HOW TO · Activate billing for a client

- 1 Either tick "**Bill this client for storage (every 30 days)**" inside the job form, or go to **Storage Billing** and tap **+ Add billing**.
- 2 In the modal: search the **Job**, set the **Monthly rate (\$)**, the **Billing start date**, tick **First month free** if agreed, add **Notes**, and tap **Activate billing**.
- 3 From then on the system creates each period's charge automatically and flips late ones to **Overdue**.

HOW TO · Collect & remind

- 1 Open **Storage Billing**. Metrics on top: **Active storage clients** · **Outstanding this month** · **Overdue** · **Due this week** · **Collected this month**; tabs **All** / **Pending** / **Overdue** / **Paid**.
- 2 Each client card shows the rate, the **current period** and the **amount due**. Tap **Mark as paid** when the money arrives.
- 3 Tap **Send reminder** to open WhatsApp with a polite payment reminder pre-written (it never reveals where the goods are stored). **Edit rate** changes the monthly amount.

8 Brokers

The list of companies we work for — Allied, Atlas, Mayflower, United, North American, Wheaton, Arpin, Bekins, plus "Direct (no broker)". Each row shows contact info, **how many jobs** and the **pending balance**. Add, edit or delete from here; job forms pick brokers from this list.

9 Settlements — broker closing sheets

Where broker-delivery money gets reconciled. Metrics: **Open closing sheets** · **Broker owes us** · **We owe brokers** · **Outstanding BOL collections** · **Pads outstanding**. Tabs: **Open** / **Settled** / **Disputed** / **All**.

HOW TO · Create a closing sheet and link jobs

- 1 Tap **+ Closing sheet**. Fill: **CS number** (e.g. CS-1024), **Load date**, **Broker**, **Driver**, **Status**. Optionally upload the **original document** (photo/PDF).
- 2 In "**Jobs en este closing sheet**" search jobs by # or client and tick them (jobs already on another sheet are flagged).
- 3 Set the **Missing pad charge (\$)** (default 7) and the broker **deductions**: Trip cost, Labor, Other fees + description.
- 4 Tap **Create**. You can also link from the **job detail** → "Carrier Settlement" → **+ Add to closing sheet...** or **+ Create new**.

HOW TO · Record a BOL collection

- 1 Open the sheet (tap **Ver** (view)) and find the job's row → tap **Record payment**.
- 2 Enter **Amount collected (\$)**, **Collection date**, **Payment method** and notes → **Save collection**.
- 3 ⚡ The collection **syncs automatically with Payments** — never enter it twice.
- 4 The detail shows the whole math: carrier fees – deductions – pads = "**Broker owes you \$X**" (or "You owe the broker").

When settled, tap **Mark settled** . Use  **Export PDF** or  **WhatsApp broker** to send it.

10 Extras & Commissions

Extras are additional charges on a job. The system computes each driver's and rep's commission automatically.

HOW TO · Add an extra to a job

- 1 Open the job detail → **Extras** → **+ Add extra** (or from the Extras page).
- 2 Pick the **Type**: *Extra CF · Shuttle · Long carry · Stairs · Packing · Flight charge · Other*.
- 3 Enter the **Amount (\$)**. For **Extra CF** you instead enter **CF count × Rate per CF** (+ fuel surcharge %) and the total is computed.
- 4 Set **Generated by**: *Driver only / Driver + Rep / Rep only* (Long carry and Stairs are always driver-only), pick the **Driver** (pre-filled from the job) and the **Rep** if any.
- 5 The **Driver % / Rep %** pre-fill from the rules below — edit if needed. The summary shows each commission and the company's net. Tap **Save extra**.

EXTRA TYPE	DRIVER ONLY	DRIVER + REP	REP ONLY
Extra CF / Packing / Flight / Other	Driver 10%	7% / 3%	Rep 10%
Long carry / Stairs	Always driver 50% (company keeps 50%)		
Shuttle	Driver 10%	7% / 3%	Rep 5%

HOW TO · Pay out commissions each month

- 1 Open **Extras**. Metrics: **Extras (month) · Driver commissions · Rep commissions · For the company**. Filter by driver, rep, month or type.
- 2 Use the  **Drivers** tab (grouped by driver, collapsible by month) or  **Reps / Back office**. Each group ends in a **TOTAL** row and a highlighted **COMMISSION** row.
- 3 Tap  **Copiar** (*copy*) or  **PDF** to send each person their summary.
- 4 Manage reps with **Reps / Employees** (top bar): add name/role/phone/email; tap a rep's name for their profile with commission per month and full history.

 **"Extras collected via payment with no commission assigned"**: if a payment was recorded against an extra but nobody assigned the commission, a banner lists them — tap **Assign commission** on each to fix the split.

11 Trips / Live Load — trucks on the road

A trip = one truck + one driver + an ordered list of stops. View tabs: **Live map** · **Active trips** · **Unassigned trips** · **All trips**. Statuses: **Loading** → **In transit** → **Completed** (or **Cancelled**).

HOW TO · Create a trip

- 1 Tap **+ Trip**. Set **Trip number** (TRIP-001...), **Departure date**, **Truck** (options show capacity: "Truck 1 · 1,600 CF"), **Driver**. New trips start as **Loading**.
- 2 In "**Stops — delivery order**", search jobs by # / client / storage and tick to add. The **capacity bar** updates live ("{n} CF left").
- 3 Reorder stops with ↑ / ↓. Toggle a stop between **Delivery** and **Relocation** (*internal move, no delivery, no collection*).
- 4 Tap **Create trip**, then on the card **Send manifest to driver** (WhatsApp with the whole stop list) and **Depart** when the truck leaves.

Operations CRM — Trips · Active trips

TRIP-004 In transit

Truck 1 · Andres M. · 07-06

82% occupied 1,310/1,600 CF

STOPS (3)

1 [A1826927](#) Monique F Hall · 510 CF · Blue **Mark delivered** **Dropped at storage** **Split**

2 [H2474156](#) Dustin Newman · 800 CF Delivered

3 **Fuel** Pilot, Columbus OH

Total: 1,310 CF **To collect: \$3,250**

Send manifest to driver

An active trip card: capacity, ordered stops (job stops + a custom fuel stop), per-stop actions and totals. "To collect" includes pending extras.

HOW TO · Drop a job at a storage mid-trip

- 1 On the stop, tap **Dropped at storage**.
- 2 Choose the destination unit or warehouse. Unit not listed? Tap **+ Unit not on the list? Create it**, fill Company / Unit # / State / size and **Create & select**.
- 3 Tap **Confirm drop**. The job goes back to storage and stays on the trip faded out as **Dropped in storage**.

HOW TO · Split a job between two trucks

- 1 Tap **Split** on the stop (or in the job detail's "Where it's stored").
- 2 Set how many CF go to each part and pick the **destination trip/truck** for the second part.

- 3 Both portions track separately; the job detail shows each portion and offers  **Merge portions** to undo.

HOW TO · Add a custom (non-job) stop

- 1 Tap  **Add stop** on the trip card.
- 2 Pick a **Category**:  *Maintenance* ·  *Repair* ·  *DOT inspection* ·  *Weigh station* ·  *Fuel* ·  *Rest (DOT hours)* ·  *Overnight/parking* ·  *Equipment* ·  *Office/terminal* ·  *Other*, plus optional address and note.
- 3 Custom stops live in the same ordered list — edit them with , tick them done with .

HOW TO · Use the Route popup & AI suggestions

- 1  **View route** opens a US map with numbered pins and the stop list: **tick** which stops to include, reorder with ▲▼ (saved per trip), then **Open in Google Maps**.
- 2  **Suggest trips (AI)** (top bar) analyzes pending jobs and trucks and proposes groupings — each card shows occupancy, the job order and "💡 **Why this trip**". Tap **Review & create** to accept or **Dismiss**.
- 3 Mid-trip, the trip detail also offers  **Add job**,  **Load from storage**,  **Unplanned pickup** and  **Handoff** — hand the whole trip or single jobs to another driver, choosing the reason (*better for this delivery / truck change / availability / other*); everything is logged.
- 4 When every stop is done you'll see "✅ **All jobs delivered — mark trip as completed?**" → tap **Mark completed**.

Also in Fleet: the  **Live map** tab shows each truck's last known position (moving / stopped) — update it via "Update location". The **Equipment** section tracks pads, dollies, straps etc. per location with  **Load on trip** /  **Unload**.

12 Payments — every dollar, tracked 💰

Metrics: **Expected this month** · **Received this month** · **In circulation (not deposited)** · **Deposited this month** · **Pending collection** · **CC fees collected**. Tabs: **All** / **Pending** / **Received** / **In circulation** / **Deposited**.

HOW TO · Record a payment

- 1 Tap **+ Payment** (top bar, or from the job detail's Payments section — there it comes pre-filled with the outstanding balance and the job's driver).
- 2 **Job**: search by job # or client and pick it. Set the **Payment date** and the **Amount (\$)**.
- 3 **Concept**: *Job / Extra / CC Fee / Storage / Other*. Optional **Discount (\$)** + reason. **Payment stage**: *At pick up / At delivery / Other*.
- 4 **Method** (pill row): *Cash · Credit card · Zelle · Venmo · Check · Money order · PayPal · Cash App · Wire transfer · Apple Pay*.
- 5 **Checks** ask for the type (*Cashier's / Personal / Official*) + serial number, bank, date, memo and a **check photo**. **Money orders** ask for the issuer (*USPS / Western Union / MoneyGram / Other*) + serial and details. **Credit card** can add a **CC fee charged to the client** (a separate CC-Fee payment is created).
- 6 Tick **Received** (+ by whom and when — automatic for digital payments). For cash/checks/money orders set "**Who has the money?**" (pre-filled with the job's driver) and, once banked, **Deposited** + date + **Bank account**. Digital methods are **auto-deposited**.
- 7 Tap **Create payment**.

HOW TO · Split a payment across charges (allocation)

- 1 In the payment modal, tick "✂ **Asignar a cargos (split)**" (*allocate to charges*).
- 2 The purple panel lists the job's charges (job balance, each pending extra) with its **Pendiente** (*pending*) amount. Type how much of the payment goes to each — the **Restante** (*remaining*) per charge updates live; overpays are flagged but allowed.
- 3 Anything you don't assign stays as "**A cuenta**" (*on account*) — you can allocate it later with the row's **Asignar** button.

💬 Request deposit

The "In circulation" view: money grouped by who holds it, with the batch-deposit bar and the WhatsApp "Request deposit" button.

HOW TO · Deposit money in batch

- 1 Open the **In circulation** tab. Each person's card shows their total and each item.
- 2 **Tick** the payments being deposited (or "Select all"), pick the **bank account** and date, and tap **✓ Deposit N · \$total**.
- 3 Manage accounts via **Bank accounts** (top bar): **+ Add account** with name, bank, type, last 4 digits.
- 4 To chase someone, tap **Request deposit** — WhatsApp opens with their full list and a polite "please deposit by end of week".

Weekly cash flow (bottom of the page): Expected · Received · In circulation · Deposited this week, plus a **projection** if everything in circulation were deposited. And remember the **red alert**: anything held 7+ days without deposit shows at the top.

13 Drivers & Trucks

Add / check a driver

+ Driver → Name, Phone, Truck ID, **WhatsApp group link**, Notes, Status. Tap a driver's name for their **profile**: **In circulation** (money on hand, undeposited), full **payment history** (received / deposited dates) and **job history**.

Add a truck

+ Truck → Name/number, **Patente** (*plate*), **Capacidad (CF)** (*capacity*), Status, Notes + Vehicle info (Year, Make, Model, VIN, License plate/state). The list shows each truck's **current load and occupancy** when it's on a trip.

14 BOL & Documents — paperwork and signatures

Generate the Bill of Lading over the company's PDF template, stamp values where they belong, and get it signed by email through DocuSign.

HOW TO · Generate a BOL

- 1 Open **BOL** → **Generate BOL** (or from a job:  **Generate BOL** in the job detail footer).
- 2 Pick the **Company template** and the **Job** (search by # or client) — the job's data loads and everything stays editable.
- 3 Review **Client & route** (addresses, dates), tick the template's **Checkboxes**, and fill **Charges**: Base CF, Rate/CF, Fuel % — add lines with **+ Extra CF**, **+ Charge**, **+ Discount**. The totals (**Grand total**, **Balance due**, **Due at pickup**, **Due at delivery**) update live in the preview.
- 4 Need text in a specific spot? Tap  **Add text on PDF** → **+ Add text** → **click on the PDF** where it goes; drag to move, drag the corner to resize, double-click to edit. Then  **Done editing**.
- 5 Tap **Save as final** — it's filed in **Documents**. (**Save draft** keeps it editable;  **Download** for a copy.)

HOW TO · Get it signed (pickup, then delivery)

- 1 Open **Documents** (BOL section). Files are organized in  **folders per broker**; each row shows its signature status: *Generated* → *Pickup sent* → *Pickup signed* → *Delivery sent* → *Delivery signed* → *Completed* ✓.
- 2 Tap **Firmar pickup** (*sign pickup*), enter the **customer's email** — they get a normal **DocuSign email** and sign from their phone. When they sign, the signed copy appears here by itself (badge **PU** ).
- 3 At delivery time, tap **Firmar delivery** — same flow; the delivery is signed **on the same document with the pickup signature still visible** (badge **DEL** .
- 4 Need to change a signed BOL? **Reopen** it, edit, and save — it becomes a **new version that inherits the pickup signature**, ready to sign at delivery. Delivery signatures are never carried over.

Templates (admins): **+ New template** → upload the company PDF, add fields with **+ Add field** or let  **Auto-detect (AI)** find them, map each to a job field / fixed text / checkbox / signature, then **Save & activate**.

15 Claims & Incidents

Anything that goes wrong becomes a claim and is tracked to resolution. Jobs and trips with open claims show a  **badge**.

HOW TO · Report and follow up a claim

- 1 Open **Claims & Incidents** → **+ New claim**.
- 2 Fill **Incident data**: link the **Job** (search) and **Trip** if any, **Client**, **Incident date**, **Incident type** ( *Damage* ·  *Theft* ·  *Missing items* ·  *Incomplete delivery* ·  *Complaint* ·  *Other*), **Assigned to** (who follows it up) and the **Description**.
- 3 Set **Status & resolution**: **Claimed amount (\$)**; the status starts **Open**. Tap **Create claim**.
- 4 After saving, attach **Evidence** (photos/documents) and add **Follow-up** notes (**+ Add note**) as things happen — status changes are logged automatically.
- 5 To close it, change Status to **Resolved** (or Denied), pick the **Resolution** — *Paid to client* / *Denied* / *Covered by insurance* / *Discount applied* — enter **Paid/settled (\$)** and the **Closed date**, then **Save changes**.

The list view has metrics (Open claims, Investigating, Resolved this year, Total claimed, Total paid out, Avg days to close) and filters by type, resolution and date.

16 Chats — team messaging

A Messenger-style inbox inside the CRM. The team channel **#general** exists for everyone; the rest you create.

HOW TO · Start a chat or a group

- 1 Open **Chats** and tap the round **+** button ("New chat").
- 2 Search and pick people: **1 person = direct message** · **2+ = private group** (optionally name it). Tap **Message {name}** or **Create group · n**.
- 3 Type in the composer and press **Enter** to send (Shift+Enter = new line).
- 4 Under your last message you'll see the receipt: ✓ **Sent** → ✓✓ **Delivered** → **Seen {time}** (groups show "👁 Seen by ..."). The header shows **Active now** / **Last seen ...** for the other person; the inbox's **Active now** row shows who's online.

17 Clients · Analytics · Suggestions

Clients

Every customer with **Phone** (tap to call), **Email** (tap to write), active jobs, total jobs and **Outstanding balance**. Tap the name → all their jobs.

Analytics

Dashboard tabs: *Resumen* · *Rentabilidad Storage* · *Revenue & Cashflow* · *Brokers & Operación* — KPIs, alerts ("where you're losing money"), charts, storage P&L per unit. Tap **Analyze with AI** for written recommendations.

Suggestions

Post an idea (optionally **anonymous**), vote with , and management replies on the card. Statuses: *New* · *In review* · *Implemented* · *Rejected*.

18 Users & Settings

Admins manage accounts in **Users**; everyone manages their own account in **Settings**.

HOW TO · Invite a user with the right permissions (admins)

- 1 Open **Users** → **+ New user**.
- 2 Enter **Email**, **Full name**, and the **Role**: *Member* or *Admin* (full access).
- 3 For Members, use the **Permissions per section** grid: one row per section, three checkboxes — **view** / **edit** / **create** (edit or create implies view). **Select all** / **Clear** speed it up.
- 4 Tap **Send invitation** — they get an email to set their password.
- 5 From the list you can later **Edit** permissions, **Send reset** (password), **Deactivate** / **Activate**, and **Delete** (only inactive users). The table shows each user's **Last login**.

Send invitation

The invite modal with the per-section permissions grid.

Settings (everyone): My account — your name and the **Display language** (English / Español); **Change password** — current + new + confirm → **Update password**; and **Sign out**.

19 Golden rules & glossary

🗑️ **Deleting a job:** possible from the job detail, the Jobs list or Dispatching. It always asks for confirmation, and it removes the job **plus** its extras and payments and unlinks it from closing sheets. **It cannot be undone** — prefer *Cancelled* or *On hold* when in doubt.

🎯 The 6 rules of the day

1. Check **Dispatching** — tackle **red/orange FADD first**.
2. No pickup/delivery today without a driver; chase every ■ **Not collected** tag.
3. Notify drivers with 💬 **WhatsApp** — the message/manifest is pre-written.
4. **Advance the status** the moment each stage happens — the board must reflect reality.
5. Watch the **Payments red alert** (cash 7+ days undeposited) and the In circulation view.
6. Anything broken or missing → open a **Claim** immediately.

Quick glossary

TERM	WHAT IT MEANS
FADD	First Available Delivery Date — earliest date the job can be delivered.
CF / Real CF	Cubic feet. "Real CF" is the measured volume; occupancy uses it once set.
Full / Direct / Broker	Job types: with storage / straight through / delivery only.
Broker · Rep	The company the job is for · the internal salesperson on the job.
Sticker · Lot #	Color label and lot number identifying the load.
Balance	Money to collect (at pickup or delivery). Includes pending extras on trips.
Extra · Commission	Additional job charge · the driver's/rep's share of it.
BOL	Bill of Lading — the job's contract; on broker deliveries also the money collected on it.
Closing sheet	A broker's settlement tally — what they owe you or you owe them.
Trip · Split · Handoff	A truck's journey with stops · dividing a load between trucks · passing jobs between drivers.
Relocation	Internal storage-to-storage move, no charge to the client.
In circulation	Money collected that someone holds and hasn't deposited yet.
A cuenta	"On account" — payment money not yet allocated to a specific charge.
Billing	Monthly storage fee charged to the client.
Gate code	Code to enter a storage unit (one-click copy in the app).
Claim	A tracked incident: damage, theft, missing items, complaint...
